EXPERIENCE

ENDO MD HEALTH, Seattle, WA June 2025 – August 2025

Healthcare startup leveraging AI & data to transform clinical workflows into digital-first experiences.

AI Product Manager Intern

- Led development of AI-driven data pipelines that automated data extraction and structured summarization of complex records, enabling users to surface insights through natural language queries reducing review time by 33%.
- Finetuned and productized LLMs to transition manual workflows to AI-first processes including follow-up protocols & automated notes, driving 20% reduction in documentation time.

MICROSOFT, Noida, India November 2021 – June 2024

Built Viva Goals, a B2B SaaS platform serving global enterprise customers as part of Microsoft's employee experience suite.

Product Manager 2 (August 2023 – June 2024)

- Established a Voice of Customer program (12 usability studies, 250+ customer interviews), synthesizing qualitative & quantitative insights into strategic roadmap recommendations that drove a 4-point NPS increase.
- Designed A/B experiments & authored PRDs to scale personalized feed and notification experiences, achieving 36% lift in user engagement.

Program Manager 2 (May 2022 – August 2023)

- Owned executive-level roadmap reporting & GTM strategy across cross-functional teams, accelerating time-to-market for marquee features by 15%.
- Shipped a natural language-based coaching experience by leading cross-functional team (UX Design, Engineering, Data Science) reducing response error rate by 58%; later integrated into Generative AI experiences as 'Copilot in Viva Goals'.

Program Manager (November 2021 – May 2022)

- Designed an end-to-end self-service support workflow for 40K+ users, improving CSAT by 16% and reducing support response times by 77% through intuitive product design.
- Accelerated onboarding of 6 geo-diverse hires to absorb 65% of support volume within one quarter by redesigning workflows, enhancing training materials and building a scalable training program.

ALLY.IO, Bangalore, India June 2021 – November 2021

Series C startup acquired by Microsoft (raised \$76M), built OKR software to measure & drive business goal alignment.

Product Consultant

- Embedded with flagship enterprise customers (Meta, Dropbox) as product SME, driving adoption through implementation, change management, & enablement while translating customer pain points into actionable product recommendations.

SABRE CORPORATION, Bangalore, India July 2019 – May 2021

Travel technology corporation and largest provider for air bookings in the Airline industry.

Product Specialist

- Conducted market research and competitive analysis to identify network & schedule optimization opportunities for a national airline, delivering \$45K in annual savings and informing decisions for new market expansion.

SKILLS AND ACTIVITIES

- Analytics: SQL, Python, R, Tableau, Power BI, Snowflake, Mixpanel; AI/ML: Claude Code, GitHub Copilot, Vercel
- Product: Figma, JIRA, Azure DevOps, Confluence, Asana, Miro, Salesforce, Notion, UserTesting, Productboard, Aha!
- Teaching mentor for underprivileged students at an NGO; National Medalist in speed skating and roller hockey
